

360 *green* clean

What is Green Cleaning?

Due to our commitment to remain the innovative leader of the building service industry, we have formed **360greenclean**. Green cleaning is composed of environmentally friendly products and methods that contribute to a cleaner, safer and healthier environment for workers and building occupants.

Our program utilizes certified products and equipment, but the foundation that contributes to the success of 360greenclean is the training and support that occurs on a persistent basis.

Healthy Business... Healthy Employees

Many employees in America continue to suffer from illnesses caused by Sick Building Syndrome. Now you have the opportunity to switch to a cleaning program that provides a healthier environment with the same cleaning efficiency experienced with the traditional cleaning chemicals and products. Protect the health of the most important asset of your business...Your Employees.

Benefits of Green Cleaning

- o Improve Indoor Air Quality
- o Healthier Facilities for Everyone
- o Reduce Employee Sick Days
- o Reduce Healthcare Costs
- o Minimize Exposure to Harsh Chemicals
- o Clean without Compromising Effectiveness

Products

The **360greenclean** program is an alternative to the harsh chemicals that many studies suggest cause adverse effects on our health. Due to advancements in science and technology, there are products available that reduce these adverse effects and provide efficient cleaning.

The majority of the products utilized in the 360greenclean program are Green Seal® certified and all comply with U.S. Green Building Council standards.

Processes and Equipment

The foundation of the **360greenclean** program is the processes, which includes the initial and ongoing training of those performing the 360greenclean services. The goal of our processes is to create consistency in the service. Our processes further solidify our commitment to providing a service that protects the health of everyone involved.

Who should utilize 360greenclean?

No matter where you are located or what business you operate, "green cleaning" is a smart and healthy alternative. Also, facilities interested in pursuing LEED certification can benefit from 360greenclean.

When do I need 360greenclean?

When you implement green cleaning, it must occur on a consistent basis. Our first priority is to clean for health. Our second priority is to clean for appearance.

Making the Switch to Green...It's Simple!

Switching to **360greenclean** is simple and does not require any transition issues from your current cleaning service. We will provide you with the details of the program and keep you informed throughout the process.

We understand that your time is valuable and we will make the switch a simple process that produces a healthy result.

LEED® Certification

Our program can assist those interested in obtaining LEED® certification. By choosing 360greenclean, you have the opportunity to achieve many of the points necessary for certification.

To learn more about LEED® certification, contact the U.S. Green Building Council.

360clean utilizes progressive processes and a line of products that are environmentally preferred. Our system of "**Green Cleaning**" directly contributes to a cleaner, safer and healthier environment for workers and occupants of our client's facilities. And the best part...we make it simple to **go green**.
